OurDigitalWorld

All-in-One Newspaper Digitization Service

All-in-one service includes:

- **Friendly, ongoing consultation and support** to achieve your goals
- **Digital conversion** of your microfilm or paper newspapers
- **Online display** of publications / issues / page images including full text
- **Linked index records** to enhance BMD and article-level discovery
- **Cloud-based software** for ongoing indexing and news content management
- **Fully customizable website** to display your newspaper collection
- **Optimized search and discovery** tools to extend your online services

Return on investment

- We handle all the learning curves: digital files, processing, vendor negotiation, and database set up
- We deliver a sustainable, persistent and standards-based digital collection and website
- We provide the technical infrastructure
- No need to maintain microfilm readers
- Manage and add to the collection with easy to use software

Who's going to love you?

- **Genealogists** — Instead of single seat access, your newspaper collections are available anytime, anywhere
- **Historians** — Better images means detailed viewing of primary materials
- **Teachers & Students** — Fast, full text results from full pages and indexes—from their desktops
- **Your staff** — Search names, subjects, locations for easy, focused retrieval
- **Newspaper publishers** — Instantly find back articles and photos from heritage papers
